

Immotus

Super Shallow Mount Bollard

Unmoved. Unshaken. Undisturbed.

Flexible Installation Without Compromising Security

The Immotus shallow mount bollard is perfect when you want extra security, design options and versatility. Easily retrofitted to existing or new public spaces, Immotus defends spaces from acts of terrorism using hostile vehicles.

The Immotus Bollard is ideal for locations with underground services as it that requires a shallow foundation of only 400 mm. Yet performance is uncompromised, single bollard certification for IVA-14 impact test certification, resisting a 7,200 kg truck travelling at 64km/h, with <0.4m penetration. You can also specify Immotus in a variety of colours and finishes to seamlessly blend into your environment.

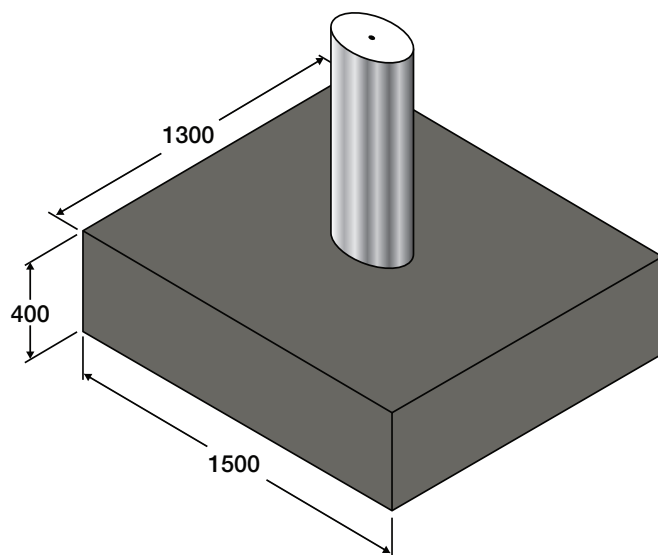

1 Simple, efficient and cost-effective to install almost anywhere

2 Flexible configuration to maximise your layout design

3 Customisable shape and finish options to suit your space
