

TITAN II

Shallow Road Blocker

Fast Deployment To Defend Your Critical Spaces

Freedom Of Movement In Your Spaces When You Need It.

When you need to provide flexible access to a controlled area, road blockers from Gunnebo Entrance Control are a convenient and highly effective solution to deliver ease of movement without compromising on security. Fast operation and designed to deliver robust defence, you can deploy road blockers which deter hostile vehicles and keep your people and property safe.

The Titan ii Shallow Road Blocker is an IWA-14 standards certified product and has been rated to 7.2T (N2A) @50 mph (80kph). This shallow foundation blocker has been recently re-rated under IWA-14 standards to optimise the products installation time and cost. This simplified installation process has significantly reduced the quantity of fixings, removing all fixings previously located inside the blocker frame. This simplifies the installation, significantly reducing both time and cost.

1 Easy to install and operate with excellent reliability

2 Use standalone, integrated or as a sallyport / tiger trap

3 Suitable for vehicles with axle weights over 12 Tonnes

Technical Specification

Raised Height	950mm
Foundation Depth	400mm
Dimensions	3360mm Width x 2300mm Depth
Certification	IWA-14-1:2014 Blocker V/7200[N2A]/80/90:0.6 EFO
Resistance	7.2 ton @ 80Km/h, 0.6m penetration
Safety Features	Narrow 10mm gaps to mitigate against trips and catches
Operation	Electric Drive with ability to use manual via drill or hand pump
Drive	3 Phase 10A
Construction	Heavy duty steel sections, supplied with high-performance control board
