

Gunnebo TurnOGate

Safe and seamless turnstile for effective access control

TurnOGate

Gunnebo TurnOGate is equipped with a double safety system, effortlessly control reverse rotation and ensure emergency transit for both people and objects. Elevate safety measures with our innovative device, seamlessly releasing the cart passageway for optimised control and utmost security.

Technical specifications

Features

Drive	Push mechanism
Rotation	Unidirectional (it can be modified on the spot)
Weight	15 kg
IP Rating	IP 31

Materials

Upright: mirror-polished chrome plated steel

Arm: mirror-polished chrome plated steel

Sign plate: white screen-printed acrylic

Anti panic mechanism

If the turnstile is closed it remains closed and can be opened only manually via the anti-panic mechanism forcibly unhooking the turnstile itself from the fixing support on the floor, without lifting the turnstile, and allowing it to rotate in the exit direction

Hypermarkets

Supermarkets

Fitness centres

Garden centers

Leisure Centres

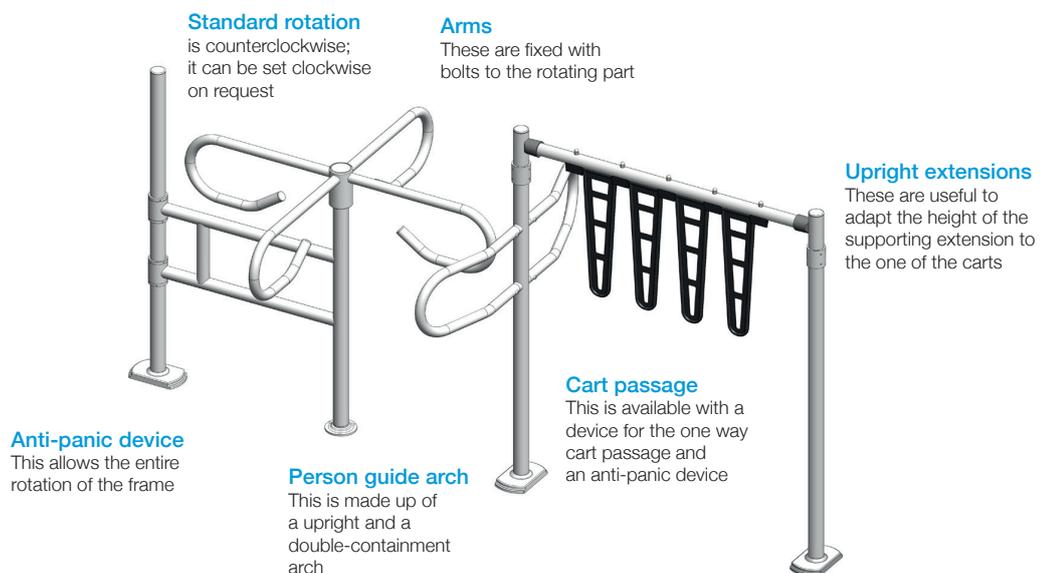

Health clubs

Museums

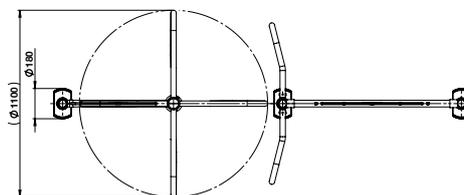

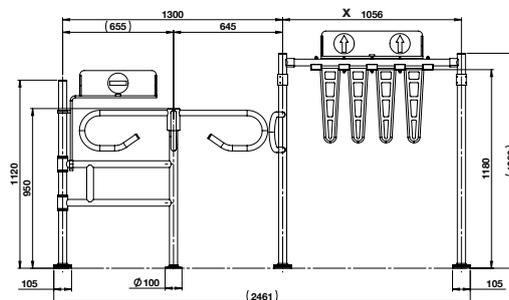

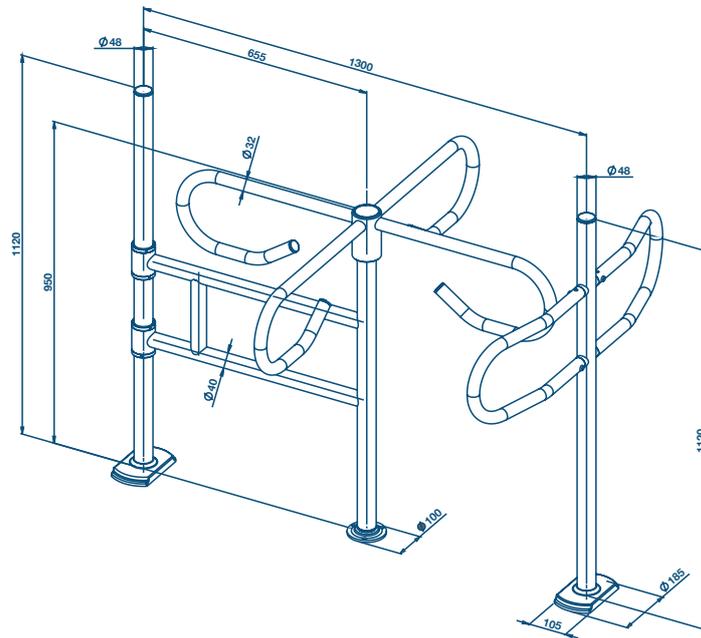

Public toilet access

Operation

- Uni-directional passage
- Manual push mechanism

Site preparation

x: this measure varies according to the chosen cart passage

Important: All horizontal conductors required for cable passage and positioned under bases of gates and of typical system components for access control must be installed at least 150 mm deep. Any chased metal ducts must be positioned in axis with the ends of the gate. The customer is responsible for ensuring that our products are managed and maintained in accordance with the layout structure, connections and characteristics defined during installation. The dimensions specified on this data sheet are approximate. For correct installation, we suggest you contact your usual Gunnebo Customer Service contact.

Notes: for the purpose of making technical improvements to the products and refining the design, please note that technical drawings and instructions are subject to modification without prior notice.
